

Legal Career Planning, Resume & Cover Letter Writing Workshops

The workshops are interactive sessions designed to equip law students with the essential skills to plan their legal career, create outstanding resumes and cover letters that effectively showcase their qualifications and experiences. The workshops will cover how to best articulate your skills, experiences and achievements that align with job descriptions.

Attendees will also participate in interactive, hand-on exercises on how to draft and refine their resumes and cover letters, receiving feedbacks from peers and your Career Development Advisor.

To cater for students' varying needs across different years of study, two sessions will be held, each targeting different years of study. Nevertheless, students are free to join whichever session they feel is most suitable.
